

## SINGLE-SOURCE REPAIR AND REFURBISHMENT OF BABBITTED COMPONENTS

*Cleveland Rebabbiting has sixty-plus years of experience with babbitted bearings, pinion sets, thrust pads and guide bearings.*

We've spent over sixty years building relationships with motor repair shops all over the world. Our customers come to us for the experience and skill of our technicians, the documented quality of our work and materials, and a proven ability to minimize outages and downtime.

In addition to our repair and refurbishment services, we also re-engineer and remanufacture babbitted components. We can handle any size internal diameter, pretreating the shells, casting the babbitt and machining the finished components. We work with high-grade steel, brass, bronze and alloys, using ultrasonic test and measurement technologies to verify the bonding of babbitt to base metal and all dimensional tolerances.

We repair and refurbish to OEM spec or better. To learn more about our heavy industry experience, capabilities and lead times, call us toll-free at 877.880.5600.

### COMPONENTS

- Compressor bearings
- Crosshead bearings
- Fan bearings
- Generator bearings
- DC mill motor bearings
- Pump bearings
- Slide shoes
- Turbine bearings
- Thrust bearings
- Thrust shoes
- Trunnion bearings

### INDUSTRIES

- Automotive
- Cement
- Mining
- Motor Repair
- Petrochem
- Power Generation
- Pulp and Paper
- Railroad
- Steel

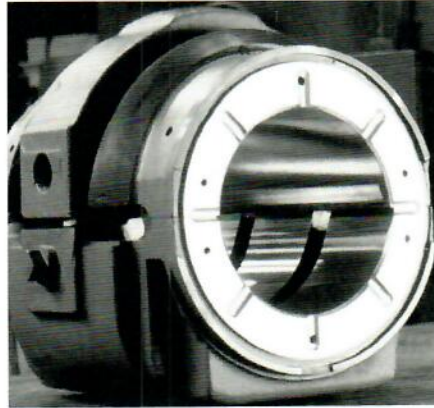

*We use only virgin-grade, OEM-spec babbitt materials that conform to SAE or ASTM specifications and test procedures.*

# SIXTY-PLUS YEARS OF EXPERIENCE COMES WITH EVERY COMPONENT WE SHIP

*We give you the shorter lead times you need, with no loss of quality in materials or workmanship.*

*We repair with centrifugal casting, static pouring, TIG welding and metalizing, using automated centrifugal casting equipment for standardized, repeatable quality.*

*We specialize in the repair and refurbishment of motor and fan bearings.*

*Machining of oil reliefs and grooves ensures optimal bearing lubrication.*

*Our repair technicians and machinists emphasize rigid adherence to OEM specifications on all vertical machines.*

*We return bearings in heavy-duty wooden crates to prevent damage in shipping and storage. The Cleveland Rebabbiting Services truck fleet is available 24/7 for pickup and delivery, and we ship all over the world.*
